

 AFTER DIGITAL

# TNEW v7

Our TNEW v7 templates offer an easy and affordable way to enhance your existing website and ticketing journeys, providing the ability to adapt brand fonts, colour sets and core asset styling requirements.

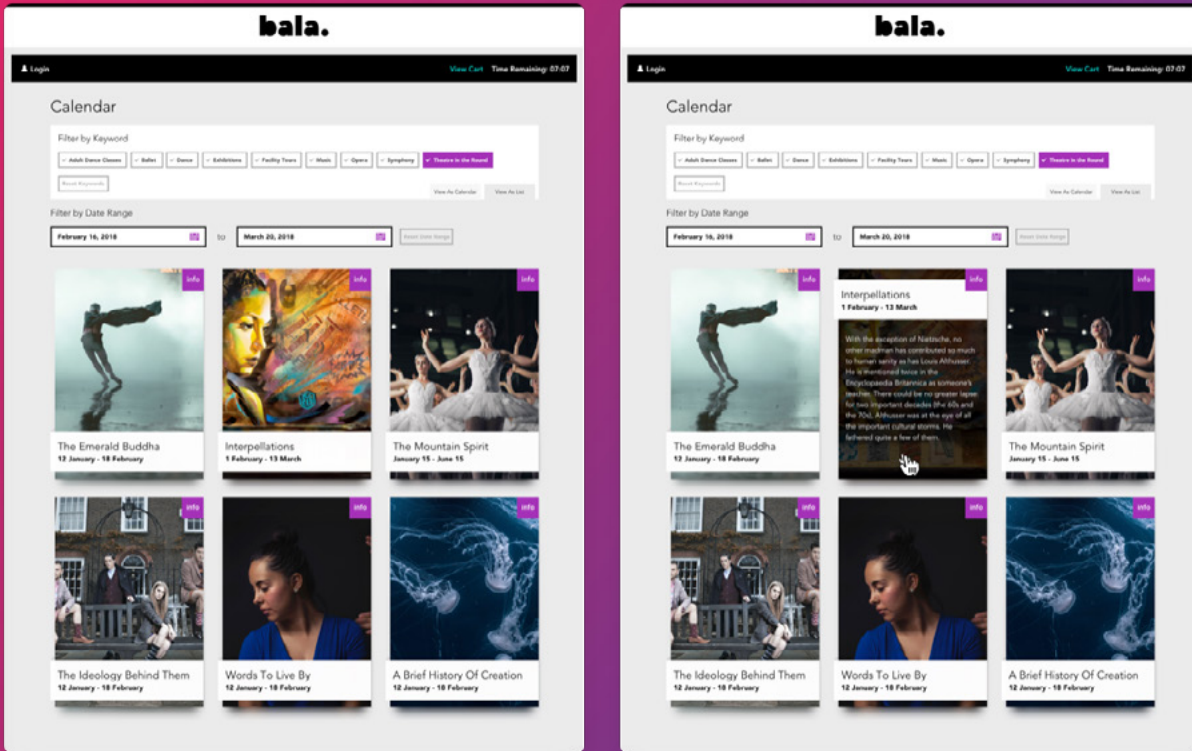

As Tessitura integration experts, we have been diligently working together with the Tessitura team to create fully responsive, mobile-friendly templates for TNEW v7 – making it possible for your organisation to take advantage of all the new out-of-the-box v7 features, as well as our own exclusive customisations that add **extra value for you** and **ease of use for your users**.

## Delivering streamlined user journeys & purchase paths

Presenting a clean and intuitive structure our templates guide users seamlessly through the SYOS and check-out processes, eliminating any choice paralysis the user might encounter throughout their journey and increasing the likelihood of a successful purchase.

We pride ourselves on creating world-class user experiences. Using the TNEW v7 style guide to craft our own dynamic What's On sections, the After Digital templates go above and beyond the out-the-box features of v7.

## Pushing the boundaries of possibility

TNEW v7 is responsive and mobile-friendly, making it more functional and robust than its predecessor. Users can now enjoy a smoother purchase journey regardless of device.

Our customised TNEW v7 templates take things a step further, from functionality to delight. We use the latest CSS styling techniques and intuitive micro-interactions to create an experience that feels premium and creates moments of joy for your users throughout their purchase path and beyond, encouraging further exploration and interaction.
